Project: 6300 Philadelphia Pike

Location: Claymont, DE

Project Details:

Project involved the rehabilitation of an existing concrete archway and sluice box that drained into The Delaware River. Concrete debris created an unstable condition under existing Conrail Tracks. Work crew placed track supports, stabilized the track ballast with cellular grout, removed the mass concrete and installed The DuroMaxx liner pipe, bends and grates under a strict timeline.

Final Product: 120 LF Contech DuroMaxx Liner Pipe

Geology: Dredge Fill, Loose Debris, Mass Concrete

Project Profile

Pipe Rehabilitation

Completion Date

October 2021
