Project: Shenandoah Raw Water Line 256.2A Road Crossings
Location: Harrisonburg, VA

Project Details:

Aaron Enterprises, Inc. provided traffic control, test pitting existing utilities, site construction entrances, erosion and sediment control, launch and exit pits, and completion of (2) separate bore and jack road crossings to install 260 linear feet of 42" steel casings under Virginia DOT roads. Backfilling of the pit and site restoration was also performed following the jack and bore. Future 24" water line would be installed at an unknown future date.

Final Product: Water Main

Geology: Dirt with some small boulders encountered
