**Project Profile**

Grouting

**Completion Date**

October 2019

**Installation Methods:**

Pipe Rehabilitation  
 Grouting

**Markets Served:**

Heavy Civil Construction  
 Railway  
 Transportation  
 Storm Water

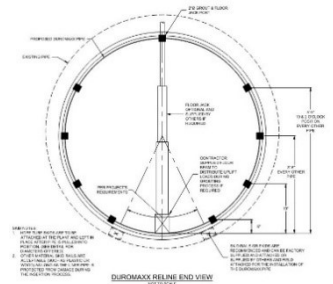

**Project:** New Jersey Transit Reline

**Location:** Cherry Hill, NJ

**Project Details:**

A large diameter corrugated metal pipe was failing under NJ Transit rails near Cherry Hill New Jersey. The 135 LF crossing was a candidate for rehabilitation. NJ Transit maintenance crews removed debris from within the host and performed the liner pipe installation. AEI installed structural blocking within the liner and pumped a 35 PCF lightweight cellular grout in the annular space between the liner and the host.

**Final Product:** 135LF of 84" diameter Contech DuroMaxx Liner within a 96" Diameter CMP

**Owner:**

NJ Transit

**Engineer:**

DL VEWS

**Contractor:**

NJ Transit
