Project: Blacks Run Interceptor

Location: Harrisonburg, VA

Project Details:

Aaron Enterprises, Inc. used an Akkerman mixed face TBM to install this line and grade critical gravity sewer crossing. Two AEI crews worked 24 hours 7 days per week while averaging 10' of casing installation per day. The crossing was extremely difficult due to the mixed ground conditions; however, Aaron Enterprises, Inc. crews did an excellent job to hit the "bullseye" on this one!

Final Product: Gravity Sewer- 196 Liner Feet of 72" x 1.00" steel casing with 48" carrier pipe @ 1.02% grade installed via Tunnel Boring Machine.

Geology: Solid limestone (20,000 psi) to pinnacles of limestone transitioning to dirt.

Project Profile

Pipe Jacking and Tunneling

Completion Date

December 2020

Installation Methods:

Pipe Jacking and Tunneling

Markets Served:

Sewer & Water

Owner:

Harrisonburg-Rockingham
Regional Sewer Authority

Engineer:

Wiley Wilson

Contractor:

Garney Construction
