

**Project:** Navy Yard 20MW HDD

**Location:** Philadelphia, PA

### **Project Details:**

Aaron Enterprises was contracted to perform three horizontal directional drills (HDDs) at the historic Navy Yard in Philadelphia. The scope of work included the successful installation of 3,032 linear feet of eight (8) 6-inch HDPE conduits.

To ensure containment of drilling fluids and maintain ground stability, each HDD entry point was reinforced with 42-inch conductor casing and treated using soil grouting techniques. This approach minimized environmental impact and ensured precise bore path control throughout the project.

**Final Product:** (8) 6" HDPE Bundle

**Geology:** Fill, Sands, Silts

### **Owner:**

Dominion Energy Services, Inc.

### **Engineer:**

Burns & McDonnell

### **Contractor:**

RCR Electrical Contractors
